U-fix foam edge protection is manufactured using low-density polyethene that has unique properties to ensure it is extremely flexible, whilst still maintaining a tight grip on edges. One of the most popular types of edge protection, particularly in the furniture and framing industry, it is economical, easy and quick to handle, and flexible.

These U Fix shaped foam profiles have been developed to efficiently protect the most sensitive parts of the product - the edges. Thanks to the hugging design of its lips, the U Fix grips the edges automatically and protects against knocks, scrapes and scratches.

\*Please note that our U Fix foam protection is not fire-rated.

100% recyclable and chemically neutral, making it a more environmentally-friendly way to package high-value products.

- 35-45mm
- 80 Pieces x 2M per box
