

ECOSPILL CHEMICAL ABSORBENT BOOM 13CM X 3M (4 PACK)

SKU: ES1010

£86.40 ex VAT

Stock: Out of stock Currently unavailable. This item will be delivered when stock arrives. 0

Our Chemical Booms are made from a yellow spunbond outer layer, with a treated hydrophilic absorbent core and surrounded by a high tensile strength outer nylon netting. This makes our Chemical booms perfect for containing larger spills on land.

The Chemical booms can be lined together to extend the area of containment and make one large containment boom.
