

ESAB SAVAGE A40 WELDING HELMET

£89.00 ex VAT

SKU: ESWHA40

The Esab Savage A40 welding mask is designed to meet the needs of various welders. Now as a new feature in this Savage A40 version is a replaceable battery for the welding cartridge. The welding mask has a high-tech light shell that protects against heat, sparks and splashes. The welding lens utilizing the latest ADF technology offers a very clear view in TrueColor colours, guaranteeing excellent optical quality. The welding cassette has an easily replaceable battery. The Esab Savage A40 welding mask represents excellent functionality, performance and comfort, both for casual welders and maintenance and construction workers, as well as for professional welders.

- External darkness adjustment between DIN 9–13 and optical class 1/1/1/2. Delay and sensitivity can be adjusted from the inside.
- Four arc sensors for more sensitive automatic dimming.
- Wider viewing angle and wider viewing area of 100 x 50 mm, providing a wide field of view and better spatial awareness.
- The sensitivity control is an adaptive feature that is useful when welding with low current TIGs, where the lens responds better to a darker arc.
- With the delay adjustment, the welder can determine how long the lens remains dark after the welding arc is turned off. A short delay speeds up work when bridging, and a longer delay is suitable for welding with high current.
- Externally activated grinding button. Darkness DIN 4 grinding mode.
- TrueColor guarantees a brighter field of vision and excellent optical quality
- Replaceable battery

The Esab Savage A40 welding mask is suitable for MIG/MAG welding, TIG welding, plasma welding, stick welding, flame cutting, plasma cutting and grinding.
