

OPTREL CRYSTAL 2.0 WELDING HELMET

SKU: OPCRWH

£459.00 ex VAT

Stock: Available to Order (3-5 Days) Ordered in and delivered within 3-5 days.

Optrel's Crystal 2.0 welding helmet with Crystal Lens Technology (CLT2.0) surpasses previously set industry standards for protection and light transmission. For the first time, welders and metal fabricators have a practically clear view of the working environment with a 31% light transmittance and a protection level of 2! The clear view in bright state makes the crystal 2.0 the ideal combined helmet. Now you can see what's really going on in the weld pool.

Features

- Now you can clearly see what happens before, during and after welding
- Like looking through a glass window
- Opening of the anti-glare display can be continuously adjusted after welding to significantly reduce eye fatigue
- Automatically adapts to changing light conditions of the welding arc
- The brightest vision during grinding work ever to be offered by a welding helmet
- Overhead Welding
- Toggle grind mode and shade level adjustments without removing your helmet
- Positions the helmet optimally on your head - with just one twist
- Guarantees optimal weight distribution and is easy on the neck
- Adapts the helmet to your environment and requirements
- Compatible with industrial construction helmet adapter accessory
