£351.00 ex VAT

Stock: Available to Order (3-5 Days) Ordered in and delivered within 3-5 days.

A world record ADF with shade level 2.5 / 8-12: The Optrel Vegaview 2.5 makes the welders' most desired wish come true: bright view. With its unrivaled brightest ADF view at opening shade level 2.5, the Vegaview 2.5 improves the visibility of welders' environment by 400%! Compared with traditional auto-darkening welding helmets, the Vegaview 2.5 sets the world record in the light state! Thanks to a special UV/IR filter, the Vegaview 2.5 offers a real color experience never seen before and finally brings color into the world of welding. Weighing only 482 g (17 oz), the Optrel Vegaview 2.5 is one of the lightest auto-darkening welding helmets available. Its ergonomic design minimizes strain on the head and neck, ensuring comfort throughout the work day. The Optrel Vegaview 2.5 is perfectly combined with the Optrel e3000x PAPR respiratory system and utilizes the integrated high-performance particle filter (TH3) to protect welders against smoke, aerosols, and dust.

Features

- Like looking through a glass window
- The brightest vision during grinding work ever to be offered by a welding helmet
- Overhead Welding
- Delay Function
- Adapts the helmet to your environment and requirements
