Why Papernet is Carbon Neutral

Carbon Neutral are companies, processes and products whose CO2 emissions have been offset through the support of recognized climate protection projects.

For Papernet, hygiene and sustainability have always been strategic values.

We believe in developing innovative products that are able to satisfy our customers, knowing that by using our products we can generate a positive impact on people and the planet.

Papernet's research is thus born the Simplicity range, created with the aim of contributing in a concrete way to global climate protection by offsetting the CO2 emissions generated by the product life cycle through a climate protection project.

Our compensation project involves the care and protection of 99,035 hectares of Amazon forest in Lábrea, Brazil.

In addition, as an additional commitment, we will commit to planting a tree in Germany for every tonne of CO2 compensated.
